OCTOBER 2023

ECONOMIC AND DEMOGRAPHIC TRENDS IN Ord, Valley County AND THE SURROUNDING AREA

This study provides data on labor force, employment, commuting patterns, population, migration, retail sales, and income for Valley County. For select measures, comparable data are provided for the surrounding area (selected counties and communities). The map featured above shows the general area for which selected comparable data are shown. In addition to Valley County, other counties included in this area are Custer, Garfield, Greeley, Howard, Loup, Sherman and Wheeler. The retail sales section also compares retail growth between Ord and eight other similarly sized Nebraska communities.

LABOR FORCE AND EMPLOYMENT

Table 1 and Chart 1 (next page) present nonfarm wage and salary data for Valley County for the period 2012–2022. Nonfarm employment is broken down into 11 sectors as defined by the Bureau of Labor Statistics and which are compliant with the North American Industrial Classification System (NAICS).

Nonfarm wage and salary employment consists of the following 11 sectors:

- Natural Resources & Mining
- Construction
- Manufacturing
- Trade, Transportation & Utilities
- Information
- Financial Activities
- Professional & Business Services
- Education & Health Services
- Leisure & Hospitality
- Other Services (except Public)
- Government

The measure of employment reported in Table 1 is data on the number of people employed in the Nonfarm Wage and Salary (W&S) sector in Valley County (regardless of their county of residence). These data indicate total nonfarm wage and salary employment in Valley County decreased 0.3 percent (6 jobs) between 2012 and 2022.

Table 1 and Chart 1 also provide employment data for Valley County by major economic sector for years 2012–2022. The Education & Health Services sector recorded the largest percentage increase in employment between 2012 and 2022 (42.0 percent or 34 jobs). The Trade, Transportation & Utilities sector recorded the largest actual employment increase between 2012 and 2022 (44 jobs or 11.0 percent).

CHART 1
Employment by Industry • 2012–2022
 Valley County, Nebraska

Chart 2 compares total nonfarm wage and salary employment growth in Valley County with metropolitan, non-metropolitan and Nebraska as a whole for the review period 2012–2022. Non-metropolitan Nebraska is defined as Nebraska minus the seven Lincoln and Omaha metropolitan counties of Cass, Douglas, Lancaster, Sarpy, Saunders, Seward and Washington.

As this chart indicates, total nonfarm wage and salary employment in Valley County decreased 0.3 percent (6 jobs) from 2012 to 2022, compared to a 4.9 percent increase for Nebraska as a whole, a 6.2 percent increase in metropolitan Nebraska and a 12.3 percent increase in non-metropolitan Nebraska.

CHART 2
Nonfarm W&S Employment • 2012–2022

Valley County, Nebraska, Metro and Non-Metro Nebraska

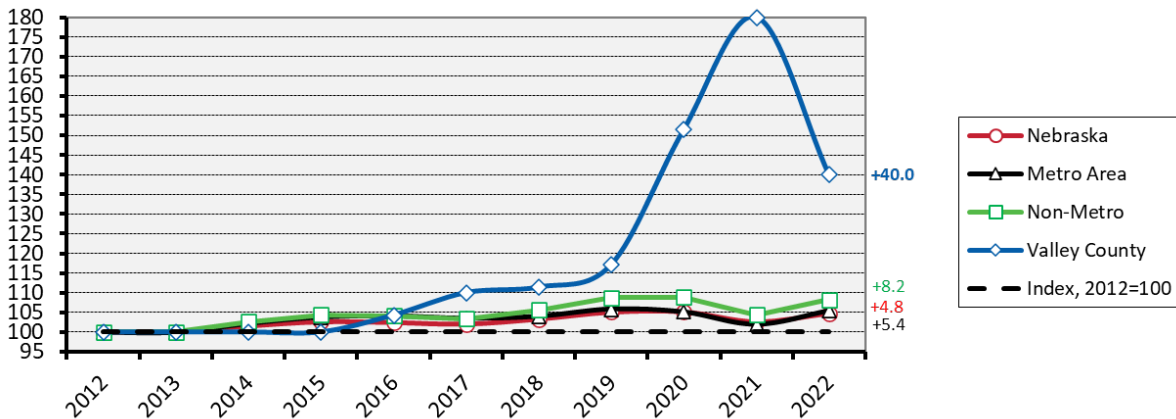

Chart 3 presents data on manufacturing wage and salary employment growth for Valley County, Nebraska, metropolitan and non-metropolitan areas. The Manufacturing sector for Valley County recorded a 40.0 percent increase in employment (20 jobs) between 2012 and 2022. This compares to a 8.2 percent increase in employment for non-metropolitan Nebraska; a 4.8 percent increase for Nebraska as a whole; and a 5.4 percent increase for metropolitan Nebraska over the same period.

CHART 3
Manufacturing W&S Employment • 2012–2022

Valley County, Nebraska, Metro and Non-Metro Nebraska

Source: Bureau of Labor Statistics, Quarterly Census of Employment & Wages (QCEW)

The next series of charts (Charts 4, 5 and 6) display the distribution of nonfarm wage and salary (W&S) employment by major economic sector in Valley County compared to the non-metropolitan and metropolitan distributions.

When comparing the Valley County employment sectors to non-metropolitan Nebraska, the largest deviation occurs in the Government sector which makes up 33.0 percent of the county workforce (579 employees) compared to 16.6 percent for non-metropolitan Nebraska; a difference of 16.4 percent. Comparing Valley County to the overall metropolitan distribution, the largest deviation is found in the Government sector (33.0 percent Valley County vs. 13.8 percent metropolitan Nebraska; a difference of 19.2 percent).

CHART 4, 5 & 6

Nonfarm W&S Employment by Major Economic Sector

Source: U.S. Bureau of Labor Statistics

The next table (Table 2) shows labor force information for Valley County for the time period 2012–2022. Labor force data (labor force, unemployment, and total employment) are measured based on the county of residence of the labor force participants (regardless of where they work). As the labor force and total employment data indicate, there was a decrease in the number of Valley County residents participating in the labor force between 2012 and 2022 (0.7 percent or 14 people).

The number of those unemployed in Valley County decreased by 35.6 percent (26 people) between 2012 and 2022. Persons are classified as unemployed if they do not have a job, have actively looked for work in the prior four weeks, and are currently available for work. The Valley County unemployment rate was 2.2 percent in 2022; the same as non-metropolitan Nebraska (2.2 percent), below that for metropolitan Nebraska (2.4 percent), and below Nebraska as a whole (2.3 percent).

RESIDENCE AND WORK FLOW PATTERNS

The next series of tables show residence (Work Destination) and workflow (Home Destination) patterns for Valley County. A Work Destination report looks at where residents in a selected area are working (where they are commuting to work). A Home Destination Report looks at the area from which a county is pulling employees to fill positions. These data are estimates from the U.S. Census Bureau’s Longitudinal Employer-Household Dynamics (LEHD) program. This program uses a variety of statistical and computing techniques to combine federal and state administrative data on employers and employees with core Census Bureau censuses and surveys while protecting the confidentiality of people and firms that provide the data. The most current data available for Valley County are from 2020.

Table 3 (pages 6–7) examines the Work Destination area for Valley County from three perspectives: by state, by county, and by place (city). In Table 3, the Census identified 1,775 county labor force participants holding primary jobs. As Table 3 shows, 98.5 percent of Valley County’s labor force participants are employed within the state of Nebraska. Approximately 50.3 percent of Valley County workers remain within Valley County for employment with 49.7 percent leaving the county borders for work (next page). The top ten incorporated places where Valley County labor force participants are employed are also shown on the following page.

People also travel from other locations to work in Valley County—this is the Home Destination Report or the labor shed area. Table 4 (pages 8–9) depicts the home locations of those employed within Valley County. The Census identified 1,530 primary jobs within Valley County. As Table 4 indicates, 98.6 percent of these jobs are held by Nebraska residents. Approximately 58.3 percent of Valley County workers live within the county borders and the top localities show the distribution of employee residents around the area (next page).

The next table and charts (Table 5, page 9, Charts 8–16, pages 10–12) show an inflow/outflow report for the Valley County labor force. The data show labor force and employment size, efficiency and other characteristics. These data were also obtained from the U.S. Census Bureau’s Longitudinal Employer-Household Dynamics (LEHD) section and help identify characteristics of labor force movement for Valley County. More detailed figures can also be found in Tables 6–8 (pages 10–12).

The Distance/Direction Report depicted in Table 9 and Figure 1 shows the number (count) and percentage (share) of primary job holders living in Valley County and the distance they travel to work. Looking at Table 9, the count of primary job holders living within Valley County is less in 2020 compared to 2018. The distribution of miles traveled to work has not shifted significantly since 2018. Figure 1 shows the location and concentration of these workplaces.

Table 10 and Figure 2 show the number (count) and percentage (share) of people employed within Valley County and the distance to their homes. Looking at Table 10, the number of primary jobs held within Valley County has decreased since 2018. The data also show the majority of Valley County employees continue to travel less than 10 miles from work to home. Figure 2 shows the concentration of job counts by distance and direction.

POPULATION AND MIGRATION TRENDS

The following tables (Tables 11 and 12) present population trend data for Valley County and the surrounding area. As Table 11 indicates, Valley County’s population experienced an average annual decrease of 0.8 percent between 1970 and 2010 for a total 1,523 people. This compares to an average annual increase of 0.5 percent, 341,008 total, for Nebraska as a whole. From 2010 to 2022, Valley County experienced an average annual decrease of 0.6 percent, or 187 people. This compares to an average annual increase of 0.6 percent for Nebraska over the same time period.

Wheeler County	1,051	1,060	948	886	818	775	785	-0.6	-0.3

Table 12 data reveals the population of Valley County’s incorporated places as a whole experienced an average annual population decrease of 0.5 percent from 1970 to 2010 and an average annual decrease of 0.2 percent from 2010 to 2022 for a total of 19.4% percent (649 people) from 1970 to 2022. Ord, the county’s largest city, reported a 13.4 percent decrease in population (326 people) between 1970 and 2022. The unincorporated areas outside of the selected communities experienced a 43.7 percent decrease (1,061 people) during the period 1970–2022.

The next table and chart (Tables 13 and Chart 17, next page) provide detail on migration patterns. Data reported in these tables are 2017-2021, five-year estimates, which are the latest multiyear estimates available. Multiyear estimates from the American Community Survey are “period” estimates that represent data collected over a period of time (as opposed to “point-in-time” estimates, such as the decennial census, that approximate the characteristics of an area on a specific date). Migration patterns are influenced by employment opportunities, cost-of-living and quality-of-life.

Table 13 data show the current population one-year or older is 15 greater than the number of people living in Valley County one-year ago. This indicates Valley County experienced a net increase in its population age one and older and in-migration was greater than out-migration plus the number of deaths.

TABLE 13
5-Year Estimate Population Change
Due to Migration and Mortality · 2017-2021

Valley County, Nebraska

Current population one-year or older	4,005
Number of people living in the area one-year ago	3,990
Population change due to migration and mortality	15

Source: American Community Survey, Geographic Mobility By Selected Characteristics In The United States & Geographical Mobility In The Past Year By Age For Residence 1 Year Ago In The United States

The 2017-2021, five-year estimates in Chart 17 reveal a net gain of 6 people from other Nebraska counties and a net gain of 3 people from other states for a total net gain of 9 people one-year or older. As shown in Chart 17, net gains occurred in the age groups Age 45 to 64 (gain of 57), Age 65 and over (gain of 11), and net losses in age groups Age 1 to 17, (loss of 1), Age 18 to 24, (loss of 53), and Age 25 to 44, (loss of 5).

Chart 17 also shows the net gains and losses by educational attainment for persons ages 25 and older. There was a gain in residents with a HS diploma or less (gain of 27), bachelor's degree, associate's degree, or some college (gain of 35), and graduate or professional degree (gain of 1).

The following chart and table (Chart 18; Table 14) compare the U.S. Census Bureau’s age distribution of population for Nebraska as a whole and Valley County. The population of Valley County is significantly older in age than Nebraska as a whole. The median age for Valley County residents in 2022 was 44.1 years of age compared to 37.3 years of age for residents of Nebraska as a whole.

CHART 18

Age Distribution of the Population • 2022

Valley County and Nebraska

TABLE 14

	2022 Population		Percent	
	Nebraska	Valley County	Nebraska	Valley County
4 & Under	123,837	236	6.3%	5.8%

RETAIL SALES

Table 16 and Chart 20 show the retail sales (non-motor vehicle) pull factors for Valley County and the surrounding area for 2022. The pull factor is computed by dividing the per capita taxable, non-motor vehicle (NMV) retail sales by the state average per capita NMV retail sales. A pull factor of one indicates an area has per capita NMV retail sales equal to the state. A value greater than one indicates an area is drawing retail sales from other areas. Conversely, a pull factor with a value less than one indicates the subject area is losing potential retail activity to other places or, in other words, is experiencing retail sales leakage. This simple calculation does not factor in income levels or purchasing power within an area.

TABLE 16

Retail Sales Non-Motor Vehicles Pull Factors · 2022

Nebraska, Valley County and Surrounding Counties

	2022 Population	2022 Retail Sales (x \$1,000)	2022 Per Capita Sales (\$)	2022 Pull Factor
Nebraska	1,967,923	\$30,977,448	\$15,741	1.00
Non-Metro Nebraska	771,188	\$10,279,275	\$13,329	0.85
Valley County	4,073	\$48,978	\$12,025	0.76
Custer County	10,476	\$112,021	\$10,693	0.68
Garfield County	1,801	\$25,813	\$14,333	0.91
Greeley County	2,227	\$12,662	\$5,686	0.36
Howard County	6,515	\$43,310	\$6,648	0.42
Loup County	599	\$1,797	\$3,000	0.19
Sherman County	2,980	\$13,636	\$4,576	0.29
Wheeler County	785	\$4,240	\$5,401	0.34

CHART 20

Source: U.S. Census Bureau and Nebraska Department of Revenue

Reviewing the pull factors at the county level indicates Valley County experiences net retail leakages. The 2022 pull factor of 0.76 indicates, on a per capita basis, retail sales in Valley County are less than the state’s average per capita sales. Distance from other large trade centers plays a major role in this phenomenon. The comparison of the pull factor for Valley County (0.76) with the pull factor for the non-metropolitan area of Nebraska (0.85) indicates per capita retail sales in Valley County are 10.6 percent below the average per capita retail sales in the non-metropolitan area of Nebraska.

Table 17 and Chart 21 compare the 2022 pull factors for selected area communities. The Valley County community of Ord’s pull factor of 1.26 indicates that, on a per capita basis, non-motor vehicle retail sales in Ord are approximately 26.0 percent greater than the state’s average per capita sales.

TABLE 17

Retail Sales Non-Motor Vehicles Pull Factors • 2022

Nebraska and Selected Study Area Cities

	2022 Population	2022 Retail Sales (x \$1,000)	2022 Per Capita Sales (\$)	2022 Pull Factor
Nebraska	1,967,923	\$30,977,448	\$15,741	1.00
Non-Metro Nebraska	771,188	\$10,279,275	\$13,329	0.85
Valley County	4,073	\$48,978	\$12,025	0.76
Ord (Valley)	2,113	\$42,075	\$19,912	1.26

CHART 21

Source: U.S. Census Bureau and Nebraska Department of Revenue

Table 18 (sorted by population) and Chart 22 (sorted by pull factor) further breakdown the 2022 pull factors into the communities reporting retail sales figures within Valley County. As this table indicates, the community of Ord had the strongest pull factor (1.26) compared to the other communities reporting in the county. Together, these communities contributed to an overall pull factor of 0.76 for Valley County in 2022.

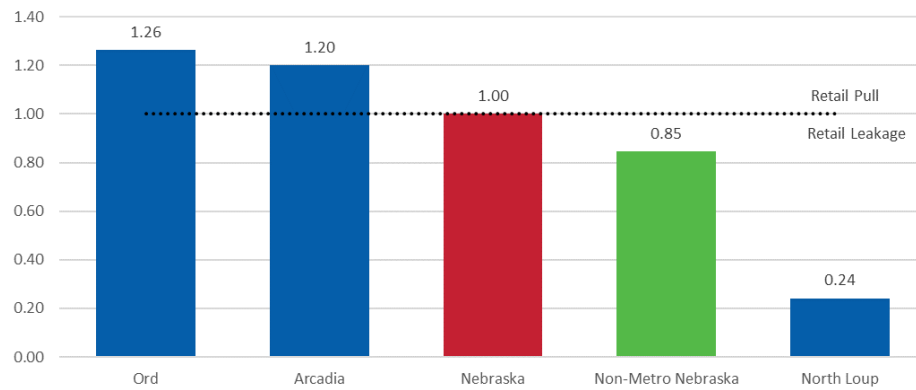

TABLE 18

Retail Sales Non-Motor Vehicles Pull Factors • 2022

Nebraska and Available Valley County Communities

	2022 Population	2022 Retail Sales (x \$1,000)	2022 Per Cap Sales (\$)	2022 Pull Factor
Nebraska	1,967,923	\$30,977,448	\$15,741	1.00
Non-Metro Nebraska	771,188	\$10,279,275	\$13,329	0.85
Valley County	4,073	\$48,978	\$12,025	0.76
Ord	2,113	\$42,075	\$19,912	1.26
Arcadia	284	\$5,368	\$18,900	1.20
North Loup	256	\$973	\$3,802	0.24

CHART 22

Source: U.S. Census Bureau and Nebraska Department of Revenue

Table 19 (sorted by population) and Chart 23 (sorted by pull factor) show the 2022 pull factors for Nebraska, Ord, and eight other similarly sized communities selected from around the state. Ord’s pull factor of 1.26 leads the group for 2022 thus indicating Ord has greater retail pull.

TABLE 19

Retail Sales Non-Motor Vehicles Pull Factors • 2022

Ord & Other Similarly Sized Nebraska Communities

	2022 Population	2022 Retail Sales (x \$1,000)	2022 Per Cap Sales (\$)	2022 Pull Factor
Nebraska	1,967,923	\$30,977,448	\$15,741	1.00
Non-Metro Nebraska	771,188	\$10,279,275	\$13,329	0.85
Ord (Valley)	2,113	\$42,075	\$19,912	1.26

CHART 23

Source: U.S. Census Bureau and Nebraska Department of Revenue

Chart 24 illustrates the pull factor trend for Ord, Valley County, non-metropolitan Nebraska, and Nebraska as a whole from 1990 to 2022. In examining the timeline, the city of Ord shows retail pull fluctuating well above the state average throughout the entire study period. Data within Valley County (as a whole) also shows the pull factor similar to the non-metropolitan county average, but below the Nebraska (as a whole) average throughout the time period.

CHART 24
Pull Factors • 1990–2022
 Ord, Valley County, Non-Metro & Nebraska (as a whole)

Source: U.S. Census Bureau and Nebraska Department of Revenue

PER CAPITA PERSONAL INCOME

Chart 25 examines the per capita personal income levels within the study area. The American Community Survey data allows us to look more closely at non-metropolitan areas in Nebraska. Information on income distribution comes from various sources including earnings, retirement income, and public assistance.

The 2017-2021, five-year estimates show per capita personal income for Valley County is estimated to be \$31,870 compared to \$35,189 for Nebraska as a whole.

CHART 25

Per Capita Personal Income • 2017-2021

Nebraska, Valley County & Surrounding Counties

Source: U.S. Census Bureau, American Community Survey

MEDIAN HOUSEHOLD INCOME

Median household income provides a different perspective of income levels than median family or per capita income. Family income is defined as having two or more related people in a household. Household income (used in this study) can consist of multiple family members or can be represented by a single person.

The 2017-2021, five-year estimates show median household income for Valley County is estimated to be \$58,015 compared to \$66,644 for Nebraska as a whole.

CHART 26

Median Household Income • 2017-2021

Nebraska, Valley County & Surrounding Counties
